

Julius

Brain Infection

-
- ▶ Julius was a Bolivian child who became ill because his mother had an active bacterial infection in the birth canal. During birth, passing through the canal, Julius ingested these bacteria thus entered in his bloodstream. Within days the infection had spread to the brain. Julius was put in an incubator to regulate their body temperature. Was connected to a cardiorespiratory monitor. He also needed a monitor called oximeter to check if oxygen level in his body were appropriate. He was given antibiotics for several weeks and there were no improvements. During the first three months of life, Julius spent most of the time crying.
-
- 

The symptoms where:

- ▶ irregular temperature
- ▶ Poor appetite and feeding difficulties
- ▶ Irritability
- ▶ Wheezing
- ▶ Insomnia

-
- ▶ Julius was in a difficult situation so we underwent an intensive plan to stimulate areas of the stomach, spleen and pancreas with the intention of strengthening the immune system. Other methods were used like cerebral Cyber points to activate blood flow. To increase the delivery of oxygen to the brain, we suggested the stimulation of acupuncture points of the Governor 26, 20 and the four points of Sishencong.

We also prescribed the use of Cranial lines for the activation of the lymphatic system.

-
- ▶ Newborn babies have very weak immune systems, but they usually also respond quickly to the treatment. 8 hours after we send the treatment plan we knew that Julius had practically ceased to mourn at all and that for the first time in his short life had slept 5 hours straight

-
- ▶ Sorensensystem TM daily base maps Facial Reflexology were applied and in eight days his temperature began to normalize, he ate better and his breathing was stable. Sometimes crying but for short moments.

During the next ten months Julius received the same treatment and his condition gradually improved.

Julius also had some motor problems and received other treatments for rehabilitation.

-
- ▶ A year later, we received news of their progress. Julius now walk, smile, speak and eat alone ...
